Hiring Manager

The House of Kemmy
Kigali, Rwanda

Dear Hiring Manager,

I am excited to apply for the UI/UX & Graphic Designer position at The House of Kemmy. With a strong background in graphic design, digital content creation, and hands-on experience in designing user-friendly interfaces, I believe I would be a valuable addition to your creative team.

My experience includes developing clean and intuitive user interfaces for mobile and web, creating visual assets for brands, and working closely with developers to ensure pixel-perfect implementation. I enjoy transforming ideas into designs that not only look good, but also solve real user problems. I am comfortable conducting basic user research, creating wireframes, prototyping, and building final layouts using tools such as **Figma**, **Adobe XD**, and the Adobe Creative Suite.

Alongside UI/UX work, I have practical skills in graphic design — including designing banners, icons, social media visuals, and marketing materials that align with a brand's identity. My background in software and tech makes it easier for me to collaborate with developers and ensure smooth delivery. I also have a basic understanding of HTML and CSS, which helps me design interfaces that are both creative and technically feasible.

What draws me to The House of Kemmy is your commitment to creativity and storytelling through design. I appreciate how design is central to the brand's identity, and I am motivated by the idea of contributing visuals and digital experiences that elevate how people interact with your products and content.

I would welcome the opportunity to bring my creativity, attention to detail, and passion for modern design to your team. Thank you for considering my application.

Sincerely,

Confiance ISUBIRIZIGIHE
