Cover Letter – UI/UX Designer Position (Kemmy Company)

Dear Hiring Manager,

I am applying for the UI/UX Designer position at Kemmy Company. I design clean, simple, and user-friendly interfaces backed by strong technical experience as a full-stack developer. I enjoy creating layouts that are easy to use, visually appealing, and optimized for both mobile and web.

I have designed and developed interfaces for e-commerce sites, hotel systems, booking platforms, and digital tools such as BuySellorRent.com, Mavete.com, and ZanaShops.com. My work focuses on clarity, smooth navigation, and a modern look that helps users complete tasks easily.

I would be happy to bring my UI/UX skills and creative problem-solving to your team. Thank you for considering my application.

Sincerely,
Kwizera Fabrice
