RE: APPLICATION FOR UI/UX & GRAPHIC DESIGNER POSITION

Dear Sir/Madam,

I am applying for the UI/UX & Graphic Designer position at The House of Kemmy. With experience in UI/UX, graphic design, and collaboration with front-end developers, I am confident in my ability to create user-centered and visually compelling digital experiences.

At Solvit Africa, I designed intuitive interfaces, conducted user research, created wireframes and prototypes, and produced digital assets while ensuring consistent design systems. My freelance work strengthened my skills in branding, visual design, and managing multiple client projects with clear communication and timely delivery. I am proficient in Figma, Adobe XD, Illustrator, and Photoshop, with a foundational understanding of HTML and CSS—skills that help me work effectively with development teams.

My technical background in Computer and Software Engineering also supports my ability to design with both usability and functionality in mind.

I am motivated by your commitment to creativity and design excellence, and I would be excited to contribute to your team. Thank you for considering my application.

Best regards,

Dembe Basile BISHIMWE
